

Phase I - Module 7

Energy Application to Case Review

Continue to review during the first half of the class period. Students should be encouraged to ask any final questions to ensure that they are confident in what they have learned to be prepared to take the assessment.

By now students should be able to demonstrate the ability to properly complete the application to case process to determine eligibility.

Energy NC FAST Assessment

Each student should be given at least 3 Energy scenarios of varying complexity from the scenarios given in class to complete from the application to case process. Students should be allotted at least 1.5 hours to complete this process.

Students should record the vital information from the application/case in order for instructor to review work and grade assessment. Further instructors must house this information for records and audit purposes.

The grading rubric can be utilized in order to grade the students' work. Points will be added or deducted for correct and incorrect points met.

NOTES:

- Activity Number = Scenario Numbers
- Average the total number of activities and score by 3
