

# Phase II – Module 16

## Final Thoughts

As we conclude this last portion of the class, it's crucial to emphasize the importance of thoroughly understanding all the material covered so far. This is your final opportunity to ask any last-minute questions. However, please be mindful not to allow students to monopolize class time, as they will need it to complete your assessments.

- **Complete survey before the start of this final assessment.**

## MAGI Application to Case Assessment

Each student will be assigned at least one MAGI scenario from the scenarios provided in class. They will have a minimum of 3 hours to complete the process from application to case.

Students must record all vital information from the application/case for instructor review and grading. This information will also be stored for records and audit purposes. The grading rubric will be used to assess the students' work, with points added or deducted based on the accuracy and completeness of their responses.

### Important Notes:

- Students must complete the entire process from start to finish. Incomplete scenarios will not be graded.
- The Activity Number corresponds to the Scenario Number.
- Scores should reflect the activity, changes, and recertification.
